

reflector from above

switch with dimmer

Dimmable LED floor lamp for perfect lighting in the modern office or workspace. This high quality aluminium lamp creates a very special atmosphere with direct and indirect lighting.

The direct light is most essential for the computer workplace with its glare-free lighting. The additional indirect light illuminates the rest of the room. The floor lamp is continuously dimmable with a rotary switch. The split base fits around table legs. The reflector and stand are made of coloured aluminium, the base is of solid metal, also coloured.

This model is in different executions available:

Art. No. 9080-1 with 60 W

Art. No. 9080-2, 9080-210 and 9080-211 with 80 W.

9080-1 LED-floor lamp, silver

aluminium, base: metal

total: 60 W, 6.896 lm

uplight: 30 W, 4.181 lm / downlight: 30 W, 2.715 lm

ALCO - floor lamps

2019

Dimmable LED floor lamp for perfect lighting in the modern office or workspace.

This high quality aluminium lamp in modern white colour creates a very special atmosphere with direct and indirect lighting. The direct light is most essential for the computer workplace with its glare-free lighting. The additional indirect light illuminates the rest of the room.

The floor lamp is continuously dimmable with a rotary switch. A motion sensor and a daylight sensor make sure, that the lamp is in function only when the presence of a person is detected. The brightness adapts to the environment because of the daylight sensor.

The split base fits around table legs. The reflector and stand are made of white coloured aluminium, the base is of solid metal, also white coloured.
